

McFall Masonry and Construction is open for business during Covid19. Under all stay at home orders, we are classified under critical infrastructure—residential construction and are an essential business. The health and safety of our customers and employees is our top priority and we are taking much care during this time.

When we come by to give you an estimate, we do not need to come into your home, no need to shake hands (this is strange for us), we are taking precautions and following measures to keep a safe 6' distance.

We do limit our crew on projects, no unnecessary laborers are being used at this time. The majority of our projects are outside, so it's a safer environment.

We value your business and loyalty during this time and thank you for allowing us to serve you. If you have any questions or concerns, we encourage you to contact us at **(972) 966-8833**.

Best,

McFall Masonry and Construction
